Personal Website

CAREER SUMMARY:

Frontend Developer with solid experience building modern, responsive web applications across diverse industries. Skilled in React, Next.js, and TypeScript, with a strong focus on performance optimization and user-centered design. Comfortable working without provided designs — independently making UI/UX decisions and leveraging AI-powered tools (Cursor, Claude, Figma AI, v0.dev, GitHub Copilot) to deliver professional, production-ready interfaces. Successfully collaborated with international clients and cross-functional teams, consistently meeting deadlines and maintaining high code quality.

WORK EXPERIENCE:

Fiverr

Frontend Developer | November 2025 - Present

Worked as a freelance Frontend Developer on Fiverr, delivering projects ranging from landing pages to fully functional web applications. A significant portion of work came without provided designs, requiring independent UI/UX decisions and use of modern AI-assisted design tools to produce professional, visually consistent interfaces.

Key projects included:

- Landing Pages & Promo Sites — Designed and developed responsive, visually polished landing pages for clients across various industries, focusing on conversion, performance, and cross-browser compatibility.
- Movie & TV Show Application — Built a content discovery app integrating a third-party movie database API (e.g., TMDb), featuring search, filtering by genre/rating/year, detailed media pages, and a watchlist/favorites system.
- Interview Preparation Platform for Developers — Developed a web platform tailored for software engineers preparing for technical interviews. Included categorized question banks (JavaScript, React, algorithms), progress tracking, and an interactive quiz mode with instant feedback.

Maintained high client satisfaction through clear communication, on-time delivery, and iterative improvements based on feedback. This experience strengthened my ability to scope projects independently, make technical decisions under time constraints, and deliver production-ready code across diverse problem domains.

Born2CodeLab

Frontend Developer | June 2024 - September 2025

I contributed to the development of large-scale web platforms across tourism, finance, and security sectors. My focus was on creating intuitive user interfaces and robust business functionality tailored to diverse user needs.

Key projects included:

- Tourism Platform — Designed a user-friendly interface for travelers and a powerful dashboard for property owners, enabling booking management, analytics, and customer communication.
- Financial Platform for Exporters — Built a technology-driven solution for small and medium-sized enterprises, streamlining financial operations, improving access to export support tools, and ensuring transaction transparency.

- **AI-Powered Security Platform** — Developed an innovative system leveraging artificial intelligence to assess risks, respond to incidents, and provide advanced protection for organizations.

I was involved in all stages of development — from architecture planning and UI creation to API integration and deployment. Collaborated closely with designers, backend developers, and product managers to ensure performance, responsiveness, and adherence to UI/UX best practices.

NDA

Frontend Developer | February 2023 - June 2024

Worked as a Frontend Developer on an early-stage FinTech startup product under a Non-Disclosure Agreement, contributing to the development of a secure and scalable web platform. Participated in product discussions, feature planning, and rapid MVP delivery, building responsive and accessible interfaces with React and Next.js, integrating REST/GraphQL APIs, and improving application performance and reliability. Collaborated closely with backend engineers, designers, and product stakeholders in an Agile environment, helping deliver user-focused financial features in a fast-paced startup setting.

UpWork

React Frontend Developer | February 2022 - January 2023

Developed a wide range of projects—from landing pages and promotional websites to complex web applications with dynamic functionality. Took part in all stages of development, including requirements analysis, architecture design, UI implementation, API integration, and deployment. Worked both independently and within teams, maintaining active communication with clients, preparing estimates and reports, and consistently meeting deadlines. Regularly optimized performance, updated codebases, introduced new UI solutions, and ensured alignment with UI/UX guidelines. This experience significantly enhanced my technical expertise, strengthened my ability to make independent decisions, and improved my collaboration skills with clients from various industries.

EDUCATION:

January 2021 - November 2022 | Dan.IT Education

Frontend Developer

<https://certificates.dan-it.com.ua/certificates/frontend/doroshenko-daniil>

2020 - 2024 | KYIV NATIONAL UNIVERSITY OF TRADE AND ECONOMICS

BA in Information Systems and Technologies

LANGUAGES:

- **Ukrainian** — Native
- **English** — Upper-Intermediate (B2)
- **Polish** — Elementary (A2)

SKILLS:

Hard Skills:

Frontend Development:

- React, Next.js, Vue.js, React Native
- TypeScript, JavaScript (ES6+)
- HTML5, CSS3, SASS/SCSS

UI & Styling:

- Tailwind CSS, Material UI (MUI)
- Framer Motion, Emotion (CSS-in-JS), Radix UI
- Responsive Design & Mobile-First, Cross-Browser Compatibility

State & Data Management:

- Redux, Zustand
- React Query (TanStack Query)
- Formik + Yup

APIs & Backend Integration:

- RESTful APIs, GraphQL
- Axios, hCaptcha, Authentication & Authorization

Routing:

- Next.js App Router, Pages Router, React Router

Tooling & Performance:

- Webpack, Vite, Babel
- ESLint, Prettier, Stylelint, Husky, Lint-staged
- Code Splitting, Lazy Loading, Source Map Explorer
- Docker, CI/CD, npm, Yarn

Internationalization & Localization:

- next-intl(i18n)

Version Control & Collaboration:

- Git, GitHub, GitLab
- Jira, ClickUp, Trello

AI-Assisted Development:

- Cursor
- Claude (Anthropic), ChatGPT
- Figma AI + MCP Server
- v0.dev
- GitHub Copilot

Soft Skills:

- Strong problem-solving skills
- Effective communication with team and clients
- Teamwork & knowledge sharing
- Time management and meeting deadlines
- Adaptability in dynamic environments
- Attention to detail
- Proactive learning and self-improvement
